

REASONS FOR SELECTING THE *Plymovent* DIESEL EXHAUST CAPTURE SYSTEM

When a City, State or Governmental agency embarks on an evaluation process to choose a product or service, there are many levels of the evaluation, and rarely do they begin and end with price.

EXPERIENCE

Plymovent and Air Cleaning Systems are the largest and most experienced companies in the Industry providing Emergency Vehicle Exhaust Capture Systems in Southern California & Southern Nevada. Our systems are third party tested and have been manufactured since 1988. The Plymovent system is not a prototype or a new concept. All of the competitors combined do **NOT** equal 25% of the Plymovent systems in operation nation wide. **No other company offers this.**

REFERENCES

With over 700 fire stations in Southern California and Southern Nevada currently using the Plymovent Diesel Exhaust Capture System, no other company comes close to our experience and system satisfaction. Additionally, there are at least another 700 fire stations in Northern California also using the Plymovent System. **No other company offers this.**

MUTUAL AID

When responding to major fires or participating in homeland security situations, it is important that your Diesel Exhaust Capture System be compatible with other departments or agencies that may be called up into your stations. This will also apply to your vehicles that may be parking in other agencies stations. Many fire stations in your area already have Plymovent systems installed. This allows the compatibility between your Departments or other agencies. Standardization between departments would eliminate the risk of carcinogenic exhaust fumes putting your personnel at risk. **No other company offers this.**

LOCAL DISTRIBUTION

Air Cleaning Systems, of Pomona, Ca. & Las Vegas, Nv. stocks over \$100,000 in both equipment and parts at our main facility in Pomona as well as in Las Vegas. We also employ five trained and certified service technicians who are experienced in the maintenance and service tune-ups of the Plymovent systems. We also employ five (5) certified and factory trained installation personnel so that we can keep the installations “in house” therefore controlling the quality timing of each installation. This assures a uniform installation and consistent, timely, quality service. **No other company offers this.**

UL LISTED MANUFACTURER

Plymovent is the only manufacturer in the Industry that is a UL listed and certified manufacturer. Their facilities and products are inspected once every 30 days by a UL inspector that comes to the facility to review their procedures. Many cities require the purchase of a UL listed product over a generic one since the UL listing reduces the liability exposure to the Municipality and its associated agencies. Both risk management and building code officials recognize the importance of a UL listed product over other products that have not been third party tested. **No other company offers this.**

UL LISTED ELECTRONIC CONTROL PANEL

Plymovent is the only manufacturer in this industry that manufactures its own electrical control operating system in its own **UL LISTED AND CERTIFIED** facility in Edison, New Jersey. This means that quality control is completely in house and production lead times are shorter as the result of no outsourcing, which can result in incompatibility. **No other company offers this.**

ISO-9001 CERTIFIED MANUFACTURER

Plymovent is one of the only manufacturers in the industry to have the ISO-9001 certification. Most cities are rated under ISO standards. This certification is used to set insurance liability ratings for your city and its residents. Whether our Department has a Class – Class VI rating, the purchase of a system that meets ISO-9001 quality standards helps our Department achieve a more favorable ISO rating. Why would any city want to compromise and do business with any manufacturer that does not hold to the same quality and safety standards that your city must uphold? Insist that any supplier provide their ISO-9001 certificate with their bid.

CUSTOMER CALL SYSTEM

Plymovent and Air Cleaning Systems offer, at no cost to the user, a web based or intranet-based work tracking software system. This **electronic accountability system** allows that in the event of a service request, the station or agency can do the request on line using the “Plymovent Online” work tracking system, or via you own department intranet system. When we receive the request, we respond with the time of arrival of our service technician, and after the service is performed, we respond once again to let the agency know the work has been completed and what was done. With over 700 fire stations in operation, we want to be responsive and accountable...and we are. **No other company offers this.**

PIONEER CLUB

Plymovent is the only company in the industry to offer this “Pioneer Club Program for Future Upgrades”. This program entitles eligible departments to receive a charitable contribution consisting of Plymovent equipment and parts in the event your system is out of date and worthy of upgrade. The equipment would be installed at an existing fire station, which at that time would be using an earlier generation of a Plymovent system. The upgrade would be given free of charge and be treated as a charitable donation. **No other company offers this.**

TWO-YEAR WARRANTY

Plymovent offers a FULL two-year warranty on all systems provided by Plymovent and installed by certified installation contractors. **No other company offers this.**

VIRTUALLY 100% CAPTURE VERIFIED BY THIRD-PARTY TESTING

Plymovent is the only company in the Industry that has third party testing verification and can say that its system captures 100% of the vehicle exhaust emissions, both particulates and gases, at idle and high RPM. Other manufacturers do make these claims, but none of them can substantiate their performance through independent third party verification. This exposes your Department to unnecessary liability and will not allow you to comply with Federal, State and Local codes such as NFPA 1500-2000-A.9.1.6 which calls for “no less than virtually 100% effective capture” or proposed standards by the American Association of Industrial Hygienist which are calling for an intended change to 0.02 mg/m³. **No other company offers this.**

Plymovent and Air Cleaning Systems are full-service companies providing not only the industry’s premier product, but also a long list of additional benefits that enhance the overall value of the Plymovent system. Features, advantages, and benefits are all ingredients in the evaluation of any product or service.

The Plymovent Diesel Exhaust Capture System offers more of these features, advantages and benefits than any other company in the Industry. There is a reason why major Metro Departments such as the City of Los Angeles, Orange County Fire Authority, Kern County Fire Department and the Riverside County Fire Department chose to invest significant capital to install the Plymovent system over all the other competitors, and it was *not* because the Plymovent system was the lowest price. In fact Plymovent was not the lowest price, but chosen because of system reliability over a long period of evaluation, as well as all of the reasons listed above.
